Subject: RE: Letter of Support for West Shore Preserve Environmental Center Project

Good Morning Donna,

The survey you sent, was completed and remitted promptly in support of this worthy cause.

Winnebago County Land and Water Conservation Department (LWCD) is endless searching for established wetlands to protect, as they are our last line of defense against runoff, before it enters the Winnebago System.

The Winnebago County LWCD strongly supports your efforts to protect this area and to use the current facilities to educate and inform the public of the importance of wetlands and all they provide.

Please use this email as our letter of support towards your project.

Sincerely,

Thomas E. Davies, Director  
Winnebago County LWCD
